PROFESSIONAL SUMMARY

Information Technology student (CGPA 9.05) with strong foundations in data structures, algorithms, and object-oriented programming. Built AI-powered web applications using Python, Flask, and REST APIs with real-time lead scoring and async processing. Demonstrated ownership by designing end-to-end solutions from requirements to deployment. Experienced with GenAI tools (Groq API) to accelerate development. Passionate about scalable systems, cloud-native architectures, and solving real customer problems through innovative technology.

EDUCATION

MLR Institute of Technology and Management , Hyderabad	Present
Bachelor of Technology in Information Technology CGPA: 9.05	
Gouthami Junior College , Nalgonda	2023
Intermediate (MPC) 94.8%	
Prerana Concept School , Nalgonda	2021
High School (SSC) 10.0%	

TECHNICAL SKILLS

- **Languages:** Python, Java
- **Frontend:** HTML, CSS, JavaScript
- **Backend:** Flask, REST API
- **Database:** MySQL, SQL, NoSQL fundamentals
- **Cloud:** AWS (EC2, S3, Lambda concepts) — actively learning
- **Tools & Practices:** Git, GitHub, VS Code, GenAI and AI-powered tools, CI/CD fundamentals, Agile

KEY CONCEPTS EXPLORED

- **Data Structures & Algorithms:** Arrays, Trees, Graphs, Hash Maps, Recursion, BFS/DFS
- **System Design Basics:** Scalability, Fault Tolerance, Load Balancing, Caching
- **Development Practices:** Code Reviews, Technical Documentation, SDLC
- **Cloud & Databases:** AWS Fundamentals, SQL vs NoSQL Trade-offs

SOFT SKILLS

- Collaboration, Problem-solving, Adaptability
- Communication, Ownership mindset

INTERNSHIP

Python Full Stack Developer Virtual Internship	Oct 2025 – Dec 2025
AICTE in collaboration with EduSkills	
• Completed a 10-week intensive virtual internship focused on full-stack development using Python. • Gained hands-on experience building end-to-end web applications integrating frontend, backend, and database layers. • Developed proficiency in Python, Flask, HTML, CSS, JavaScript, and MySQL for real-world development scenarios. • Collaborated in a remote environment, adhering to project deadlines and industry-standard coding practices. • Practiced operational thinking: considered error handling, logging, and post-deployment maintenance in projects.	

PROJECTS

MarketAI Suite – AI-Powered Sales and Marketing Platform

Dec 2025

- Collaborated with cross-functional teams to build an AI-powered platform using Flask and Groq API for generating marketing campaigns and sales content.
- Built RESTful APIs that process user inputs and generate real-time AI responses.
- Implemented a lead scoring system (0–100 scale) based on business parameters such as budget, urgency, and customer intent.
- Structured backend workflows to ensure efficient data processing and response generation.

Multi-Language Web Application

Jan 2026

- Developed a dynamic web application supporting multiple languages using PHP sessions and server-side rendering.
- Implemented seamless language switching, enhancing accessibility and user experience.
- Designed responsive UI and handled multilingual data efficiently across different views.

AI Research Paper Summarizer

Mar 2026

- Built an NLP-based system to generate concise summaries from long research documents.
- Applied keyword extraction and frequency-based techniques for accurate summarization.
- Developed a simple interface for document input and summary visualization.

CERTIFICATIONS

- **Learning Python** (Infosys Springboard)
- **Core Java** (Internshala)
- **Python Full Stack Developer Virtual Internship** (Eduskills)
- **AWS Cloud Practitioner Essentials** (AWS Skill Builder)
